## EXPERIENCE

### Oncue

*Technical Lead Engineer*

**Oakland, CA**

*Dec 2021 - Present*

- Architected cross-platform configurable inventory feature. Worked closely with PM on refining product requirements and led a team of engineers in the implementation.
- Collaborated with a cross-functional team to develop a cloud contact center to satisfy unique business needs. Utilized Twilio APIs and serverless environment and integrated with an existing CRM.
- Optimized Javascript build using vendor chunks and code splitting, resulting in a 10x decrease in build time, 3x improvement in deployment time, and improved developer productivity.
- Provided mentorship to team members via pair programming and code reviews.

*Software Engineer II*

*Mar 2021 - Dec 2021*

- Overhauled payments infrastructure using Stripe & Stripe Connect APIs, which has processed over \$55M in payments to date.
- Developed storage management feature to allow movers to create and manage recurring subscriptions, adding new revenue streams for their business.
- Built integrations with 3rd party loan providers, allowing customers to receive a cash advance and pay down their balance automatically from their transactions on our platform.
- Debug & fix slow queries and performance issues in a legacy application by employing APM tools.

*Software Engineer*

*May 2018 - Mar 2021*

- Designed & implemented a full-stack customized real-time messaging application, with support for SMS, email, and chat. Backend utilized Firebase Realtime DB, PostgreSQL, 3rd party API's, and webhooks. Front-end was built with React and Redux, and supports multiple channels, message threads, and typing indicators.
- Led development of iOS & Android mobile apps using React Native & Expo development platform.
- Engineered an extensible, user-friendly message templating feature, including support for user-customized automation for when certain messages should be delivered, providing immediate value to customers.
- Lead the team in adopting the ReactJS ecosystem.

## SKILLS

- Languages: Ruby, Java, Javascript, Typescript, SQL
- Technologies: Ruby on Rails, Node.js, React, Redux, React Native, PostgreSQL, Redis

## EDUCATION

**App Academy** | Software Engineering (2017) - *Immersive software development course with emphasis on full-stack web development and computer science fundamentals.*

**University of Miami** | Bachelor of Music (2015), *cum laude*
